## Key capabilities

### 50 Office 365 Recovery Options

Whether it's granular recovery of individual items or bulk recovery of multiple users at once, meet ANY recovery need in just three clicks.

### Comprehensive Immutability

Leverage immutable backups with immutable backup copies, ensuring your backup data is physically unreachable and completely unalterable.

### Built-In Security Features

Leverage backup immutability, multi-factor authentication, and encryption for Office 365 data that's at-rest in object storage.

### Bring Your Own Storage

Connect any storage, whether on-premises or cloud object, including Amazon S3, Azure blob, IBM Cloud, or S3 compatible storage.

### True Enterprise Scale

Enterprises can efficiently scale up large environments with tens of thousands of users utilizing architecture designed to handle any backup.

### Advanced Monitoring and Reporting

Monitor Office 365 backup and storage resources, receive alerts to address issues, and leverage reports so you can meet your RPOs.

### Infrastructure Freedom

Get the flexibility to change your backup storage at any time, avoiding penalties and vendor lock-in.

### Lowest RPO for Office 365 Data

Achieve the lowest recovery point objectives (RPOs) in the industry (<5 minutes) and also create different RPOs for different objects.

### Hybrid Support for Office 365 Backups

Streamline data protection with support for your hybrid Office 365 and on-premises Exchange and SharePoint environments.
